SAI TEJA AVADHOOTHA

FULL STACK DEVELOPER | FRONT END DEVELOPER | REACT | ANGULAR | TYPESCRIPT | NODE.JS

Halethorpe, MD | 410-302-4148 | saitejaavadhootha26@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable enterprise web applications using React, TypeScript, Angular, JavaScript, Node.js, and Express.js. Experienced across UI architecture, REST API development and integration, Redux-based state management, role-based access control, MongoDB/MySQL-backed applications, UI/UX design, and performance optimization. Hands-on experience delivering and supporting cloud-hosted applications with Azure, Git, and CI/CD workflows.

TECHNICAL SKILLS

Frontend: React, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, PrimeReact, Angular Material, Bootstrap
Backend & APIs: Node.js, Express.js, RESTful APIs, JSON, HTTP Services, Axios
State Management: Redux, Redux Toolkit, NgRx, RxJS
Databases: MongoDB, MySQL
Cloud & DevOps: Azure, CI/CD, Git, GitHub
Design & Practices: Figma, Responsive Design, Accessibility, RBAC, Agile/Scrum

PROFESSIONAL EXPERIENCE

Front End Developer | AT&T **Feb 2025 – Present**

Project: ELNAS-UI | React, TypeScript

- Develop scalable enterprise web application features using React, TypeScript, HTML5, CSS3, and reusable functional components supporting complex business workflows.
- Build modular, reusable UI components with React Hooks including useState, useEffect, useMemo, and useCallback to improve maintainability and reduce code duplication.
- Implement centralized application state management with Redux Toolkit to manage complex data flows across feature modules.
- Develop advanced search, multi-level filtering, sorting, pagination, and dynamic data-driven interfaces to improve navigation and workflow efficiency.
- Integrate secure RESTful APIs using Axios with centralized error handling, loading-state management, and optimized request patterns.
- Implement role-based access control (RBAC), protected routes, and permission-driven UI rendering for multiple user roles.
- Optimize frontend performance through code splitting, lazy loading, memoization, and re-render optimization techniques.
- Support production releases through troubleshooting, peer code reviews, Git workflows, Agile sprints, and CI/CD processes in Azure-hosted environments.

Full Stack Developer | AT&T **Jun 2024 – Feb 2025**

Project: Enterprise Catalog Application | Angular, Node.js, Express.js, MongoDB

- Contributed across the full application lifecycle, from Figma UI/UX design and stakeholder review through full-stack development and deployment.
- Translated approved Figma designs into responsive Angular components using TypeScript, HTML5, and CSS3.
- Developed backend services and RESTful API endpoints using Node.js and Express.js for data retrieval, updates, and frontend-to-backend communication.
- Worked with MongoDB for application data storage and integrated backend services with the Angular frontend.
- Implemented role-based access control (RBAC) and backend authorization logic to secure application modules and permission-based functionality.
- Built dynamic search, filtering, and category-based navigation; integrated Power BI dashboards; and supported deployment on an Azure VM with secure external access.

Front End Developer | Software Concepts LLC **Jun 2023 – Jun 2024**

- Developed responsive web application features using React, JavaScript (ES6+), HTML5, and CSS3 with a focus on reusable component architecture.
- Built functional React components with Hooks and implemented Redux for centralized state management across feature modules.
- Integrated RESTful APIs and developed dynamic UI functionality including filtering, sorting, conditional rendering, and asynchronous data handling.
- Applied lazy loading and frontend performance optimization techniques to improve application responsiveness and user experience.
- Collaborated with UI/UX and engineering teams to translate Figma designs into responsive, cross-browser compatible interfaces while participating in Agile sprints, code reviews, and Git workflows.

Full Stack Developer Intern | Optum Global Solutions **Dec 2020 – Jun 2021**

Hyderabad, India

- Supported full-stack development of responsive web applications using Angular, Node.js, and Express.js across frontend and backend components.
- Developed reusable Angular UI components, Node.js/Express backend endpoints, and REST API integrations for dynamic data retrieval and display.
- Implemented data binding and state-management patterns to support interactive UI updates and consistent application data.
- Collaborated with UX designers and backend developers to translate design mockups into functional, responsive application features and documented development processes for team knowledge sharing.

EDUCATION

University of Maryland, Baltimore County — Master of Science, Data Science | May 2023
Guru Nanak Institutions Technical Campus, Hyderabad, India — Bachelor of Technology, Electronics and Communications Engineering | Jun 2020
